Collection Systems:

23 October 1970

NOTE FOR: [REDACTED]

1. This note confirms my understanding of the separate spooling, packing, and handling arrangements for [REDACTED] photography which we discussed this morning:

a. Markings on film cans, spools, and along the edge of [REDACTED] materials should carry the [REDACTED] Mission No. annotated, as follows, to distinguish it from [REDACTED] photography: SP Segment of Mission No. M-XXX-A. Other markings regarding emulsion, contrast, date of mission, frame numbers, etc. will remain the same.

b. [REDACTED] film will be classified SECRET and should be given the same distribution as [REDACTED] photography classified SECRET [REDACTED]

2. I have asked [REDACTED] to deliver his unmarked, unclassified piece of [REDACTED] of your office, as you requested.

3. My memorandum for Chairman, COMIREX has been coordinated, approved by [REDACTED] and delivered to [REDACTED]. Thus, there does not seem to be any impediment to your proceeding with the reproduction, separate handling, and dissemination of the SP segment of [REDACTED] and any future [REDACTED] film.

4. OSA will instruct [REDACTED] to apply the proper markings and classification on the copy of the unlabeled piece of M-260-A film which is already in his hands. [REDACTED] concurs in your proposal to send a "regularly-produced," properly-marked, additional copy of the [REDACTED] segment direct to [REDACTED] whenever it becomes available [REDACTED]

5. I think we've covered all of the main arrangements bearing on this matter and that any mechanical difficulties which we may have overlooked can be remedied simply.
